### Abstract of **JP2002061096**

**PROBLEM TO BE SOLVED:** To obtain a multilayered structure which uses a coating liquid having a heat-reversible thickening property and whose layers have sufficient thicknesses in comparison with conventional multilayered structures. **SOLUTION:** This multilayered structure comprising a substrate and plural coating layers, characterized in that at least two layers of the coating layers are formed by the multicoating and multibaking treatments of a heat-reversible thickening agent.
